Software Engineer | .NET | React | LLM / MCP

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience specializing in C#, ASP.NET Core, and .NET Core, complemented by strong proficiency in React.js for building modern web applications. Proven ability to collaborate with cross-functional teams to analyze requirements, design solutions, and deliver high-quality features while maintaining and enhancing existing systems. Passionate about learning new technologies and contributing to scalable, innovative products.

Experience

Kireeti Soft Technologies Pvt Ltd. - Jan 2024 – Present

Role: Software Engineer

- **2+ years of experience** in design, development, and implementation of web applications using **N-tier architecture** and **SDLC** best practices.
- Strong experience in **C#, .NET Core, ASP.NET Core**, and **RESTful Web API** development.
- Hands-on experience building **Single Page Applications (SPAs)** using **React.js** (Functional Components, Hooks, Routing, State Management).
- Proficient in **SQL Server** and **PostgreSQL**, using **LINQ** for data access.
- Familiar with **Microservices architecture** for building scalable and modular applications.
- Experience with **Azure DevOps & Azure Boards** for CI/CD pipelines and task tracking.
- Implemented an **MCP** (Model Context Protocol) server to securely expose backend tools, APIs, and data sources to **LLMs**, enabling tool-calling, contextual reasoning, and agent-driven task execution.

TECHNICAL SKILLS

- **Languages:** C#
- **Backend:** .NET Core, ASP.NET Core, Web APIs
- **Frontend:** React.js, HTML, JavaScript, CSS
- **Databases:** SQL Server, PostgreSQL
- **ORM & Querying:** LINQ, Entity Framework
- **Architecture:** N-tier, Microservices
- **AI / LLM:** MCP (Model Context Protocol), LLM Tool Integration
- **DevOps & Cloud:** Azure, Azure DevOps, Azure Boards

Projects

Project: Enterprise Transportation Management System (TMS)

Role: Junior Software Engineer

Duration: Jan 2024 – Present

Responsibilities: Requirement Analysis, Design, Development, and Maintenance

Technologies: React.js, .NET Core, PostgreSQL, Azure, LINQ, DevExtreme, Microservices Architecture

Responsibilities & Contributions

- Worked across multiple **TMS subdomains** including **Product Management, Contract Management, Load Board, Quote Management, and Tenant Organization**, ensuring seamless integration and data consistency across modules.
- Designed and developed **Product Management** features to configure transportation products and services, supporting flexible pricing and operational workflows.
- Implemented **Contract Management** modules for managing carrier and customer contracts, including rate structures, validity periods, and compliance tracking.
- Built and enhanced **Load Board** functionality to support efficient load posting, visibility, and assignment, improving coordination between shippers, carriers, and internal teams.
- Developed **Quote Management** capabilities enabling users to generate and manage freight quotes based on routes, contracts, and pricing rules, streamlining sales and negotiation workflows.
- Utilized **DevExtreme UI components** and custom **React.js components** to handle complex business requirements while improving performance and user experience.

Education

Global College of Management, Hyderabad

MBA – Marketing & Systems | 70.2% | 2024

SR & BGNR College, Khammam

Bachelor of Commerce (Computers) | 80% | 2022
